

## NEW FROM VARGUS:

**Introducing the Modular Toolholder Heads for the TMSD Line – for Thread Milling in Deep Holes***One modular toolholder head fits an assortment of shank lengths*

**January 2021, VARGUS Ltd.**, global leader in threading, and designer and manufacturer of the VARDEX TMSD Line for single-tooth thread milling indexable inserts for deep holes – is proud to introduce the addition of another versatile toolholder in this Thread Milling program.

The **TMSD Modular Toolholder Heads** are used for fast and simple switching of tools, therefore saving time and money by only needing to change the heads!

These new and economical **VARDEX** interchangeable heads avoid the cost of purchasing additional tools. In addition to being cost-effective, the **VARDEX** toolholder heads are compatible with the most popular shanks available today. These flexible, modular solutions are suitable for use with various thread length applications (deep and shallow). These tools are engineered with High Pressure Coolant Thru holes which reduce the temperature from the cutting edge and improve chip evacuation. With the **VARDEX** modular toolholder heads, productivity and tool life are automatically increased.

## Overview of the Modular Heads' Benefits:

- One modular toolholder head fits an assortment of shank lengths
- The heads are compatible with the most common steel and carbide shanks in the market
- Tools include High Pressure Coolant Thru for extended tool life
- Multi-flute tools for fast machining
- Suitable for TMSD U Style inserts and include the most popular standards: Partial 60°, Partial 55°, ISO Metric, American UN, BSP (G), NPT, API Round & Trapez
- Especially suited for deep holes
- Reduced load on cutting edges due to single point insert design

The new TMSD modular toolheads are fully integrated in the **VARGUS GENius™** software for tool selection and cutting data – ready to meet your most demanding threading requirements.
