

PRESS RELEASE

JANUARY 2021

**NEW FROM VARGUS:**  
**Smooth Cut System Toolholder Heads**  
*Modular Toolholder Heads for Anti-Vibration Shanks*

**January 2021, VARGUS Ltd.**, global leader in threading, and designer and manufacturer of thousands of thread turning, thread milling and gear milling tooling solutions – is proud to officially launch the new line: **VARDEX Smooth Cut System Toolholder Heads**.

These modular toolholder heads for anti-vibration shanks are designed for standard thread turning inserts in sizes IC3/8" (16mm), 1/2" (22mm), and 5/8" (27mm).

Each toolholder head can be used with a wide range of shanks of different lengths, with a maximum overhang of 5xDa (Da – shank diameter).

The Smooth Cut System is compatible with the most common anti-vibration shanks in the market. Shanks and coolant centralizing tubes are not included.

Note that the toolholder heads are designed to be used with High Pressure Coolant thru (up to 70 bar), which is highly recommended for better chip evacuation and increased tool life.

Learn more about the **Smooth Cut System Toolholder Heads**, and other VARGUS innovations at our website: [www.vargus.com](http://www.vargus.com)

**Issued on behalf of VARGUS Ltd.**
